Preliminary Specifications - subject to change

Multiple Monitor Awareness.

Wyse TCX Multi-display 1.2 virtualization software makes virtual desktops and applications multi-monitor aware over RDP and ICA connections.

Increased Productivity and Satisfaction.

Wyse TCX Multi-display 1.2 is the software that provides multiple monitor awareness for virtual desktops and applications over ICA, RDP connections in VDI and terminal services environments, using Wyse thin clients. Instead of trying to consolidate everything in one monitor that could limit users to many minimized or resized windows, Wyse users can now easily open windows and applications side by side on up to 4 monitors and leverage the extra screen real estate. This helps increase end user's work productivity and satisfaction. Wyse TCX Multi-display 1.2 now adds virtual channel support to enable logon GINA dialog box positioning. RemoteApp support for Windows Server 2008 is also enabled.

Users have total control over dialog box and message box positioning. They can recall and reopen applications at positions where they were previously closed. Users can also configure exclusion list for applications to apply or not apply the multi-display settings.

At a glance:

User Experience

- Enhances the “span” mode of RDP/ICA desktop connections.
- Provides windowing capabilities that make the remote desktop multiple monitor aware.
- Dialog boxes/popup windows are centered on the appropriate monitor.
- Users can leverage all the available screen real estate without compromising application behavior and dealing with annoying popup dialog boxes that position on the “border” between the monitors.
- No-compromise thin-computing experience.
- Server-side software enhancement for Wyse product family only.

Connectivity

- Logon GINA dialog box positioning using a virtual channel. Logon dialog box to the remote session correctly positions on the primary monitor. No need to configure the software as a service to achieve this.

Wyse TCX Multi-Display™ 1.2

Specifications

Supported Server Platforms	Microsoft Windows Server 2008 Microsoft Windows XP Professional with SP2 (32bit OS) Microsoft Windows XP Professional with SP2 (64bit OS) Microsoft Windows Server 2003 Standard with SP1 (32bit OS) Microsoft Windows Server 2003 Standard with SP1 (64bit OS) Microsoft Windows Vista Ultimate (32bit OS) Microsoft Windows Vista Ultimate (64bit OS) Citrix Presentation Server 4.5 or later Microsoft Terminal Services Environment VMware VDI
Supported Wyse Platforms	Wyse V Class L / LE Wyse G Class Wyse X Class
Supported OS	Wyse Thin OS v5.2 Build 035 or later Wyse Linux v6.3.2 Build 028 or later Microsoft Windows CE v5.0 Wyse FR2 Build 563.8 or later Microsoft Windows XP Embedded SP2 v3.04 build 527 or later
