

Wyse Microsoft Windows XPe

Maximum Flexibility and Power for Thin Computing

Wyse-enhanced Microsoft Windows XPe gives users the applications and performance they want, while delivering the flexibility and administrative simplicity that IT administrators need. So you can take advantage of enhanced security thin computing offers, along with peripheral and add-on support that Windows XP is famous for.

Running Microsoft Windows XPe on Wyse thin computing devices gives IT departments the ability to deploy fully functional desktop computers with better manageability and significantly lower total cost of ownership than personal computers.

Wyse Windows XPe-based thin computers can run 32-bit Windows applications, either locally or from servers located on the network. Additionally, when you deploy Microsoft Windows XPe on thin computers, you get the most flexibility to add and support peripherals and other add-ons.

By combining this robust operating system with firmware components, Wyse is able to reduce boot times and increase protection against viruses, trojan horses, and other malware. Giving you a more secure solution with the flexibility to add standard peripherals. Peripherals can only be connected with permission from the IT administrator.

Windows XPe requires a minimum of 256MB of flash memory and 256MB of RAM on any thin device. It is supported on the Wyse S90, Wyse V90 Dual-Video, Wyse V90, and Wyse 941GXL thin computers.

Sold and Supported by:

Features

Microsoft Windows XP Embedded, Service Pack 2

Runs familiar Windows XP graphical user interface with Wyse firmware enhancements

Local Windows XP interface, also displays desktops and applications via multiuser Windows NT and 2000 servers

Enables embedding of customer-selected local 32-bit Windows applications

Supports RDP 5.x, ICA 9.x, and SGD 4.x protocols with 15 resident terminal emulation options

Support for latest Citrix ICA client (version 9.x), including digital dictation for ICA

Includes built-in Microsoft Internet Explorer 6.0

Microsoft Media Player

Benefits

Rich Windows desktop environment to run desktop application software with vast peripheral and device driver support, plus the ability to embed local applications.

Wyse enhancements include security features, optional windowing, fast boot, and more.

Delivers high availability of key applications because they can run either on the server or locally.

Delivers the flexibility, performance, and power of the Windows operating system.

Connectivity to almost any back-end system and flexibility to choose the optimal protocol.

Allows you to use the latest ICA features, including USB PDA Sync, Windows Key Passthrough, and NTLM Proxy Authentication. Also supports digital dictation in ICA sessions, so that users can record meeting notes via microphone.

Local IE browser provides access to web-based applications with robust browsing capabilities.

Plays industry-standard multimedia formats.
